SUBJECT: Work Plan Modification, Collierville NPL Site, Collierville, Tennessee

FROM: Rutherford B. Hayes, Chief *R.B. Hayes*
Ground-Water Technical Support Unit

TO: Elizabeth Brown, Remedial Project Manager
KY/TN Section, North Remedial Branch
Waste Management Division

As requested, we have reviewed the proposed modification to the Collierville NPL Site work plan that involves the relocation of a monitoring well. We have no objection to the relocation of the monitoring well as proposed. It should be noted, however, that a well or wells located to the north of the City's East Well will be necessary at some point in this investigation, consistent with the comments voiced by Lee Thomas. As such, the problem of access to this area will arise eventually even should the proposed relocation be approved. If the intent of this proposed relocation is to allow time to complete necessary arrangements for access to the area north of the City's East Well, we have no objections. If, on the other hand, the intent is to substitute the new location for that north of the East Well, we can only comment that this will not accomplish the purpose of the well in the original location. As stated above, a well or wells would eventually have to be placed in the original location.
